

MOBILE RAPID DC CHARGING

FOR THE PRICE OF A SET OF 21" P Zero tyres

/// FLEXIBILITY Have you realised that no matter where you install a fixed rapid charger, it's always in the wrong place? Sometimes you need it in your showroom, then again on your forecourt, in your workshop or even on the road to help out a stranded customer

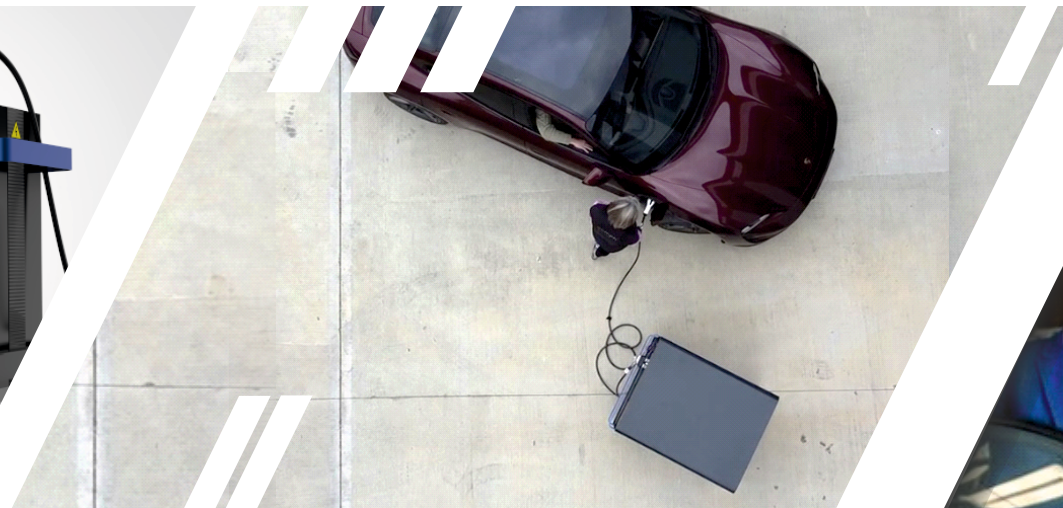

/// YOU NEED IT NOW So, before you embark on the long and expensive journey of having a fixed rapid charger installed, why not get a mobile rapid DC charger? You can have a mobile charger in action in a matter of weeks, all without excavating your site!

/// LOWER FINANCIAL RISK Having a fixed charger installed is a major financial commitment, and that's if you own your site. In these early days of the EV transition, is this really the moment to put all your money into fixed infrastructure? With Oomph, you can take advantage of our attractive leasing options and keep your options for the future open

DC 30 or 60kW kWh
CCS Battery Systems

FULLY MOBILE DC POWER, NO LONG CABLES NEEDED

New sales tool to help demonstrate DC charging to new customers

- ▶ **Increase EV sales** Putting new buyers at ease with the rapid charging experience in the comfort of the showroom will help to draw them over the line
- ▶ **Improve efficiency & reduce costs** No more time-consuming visits to a public charging station or moving vehicles around on site. Enjoy your own cheap night tariff for recharging of the mobile DC charge
- ▶ **Create additional revenue streams** For instance by offering on-demand charging for premium customers while they are waiting for their home charger to be installed
